

Erasmus Mundus Master and PhD program in Photonics

The Erasmus Mundus program EUROPHOTONICS financed by the European Community will start in September 2010 (see website: <http://www.europhotonics.org>). The consortium is composed of the universities of Barcelona (Spain), Karlsruhe (Germany) and Marseille (France). The main discipline of this Master is PHOTONICS (nano-photonics, optical engineering, bio-photonics) The Master is divided in 4 semesters (2 years) taught in English by the different institutions (see website for details).

- 12 fellowships will be given to students from non EU countries (Category A).
- 8 fellowships will be given to students of category B (that are not in Category A).

Roughly, the expenses (tuition fees, travel, accommodation, and subsistence, insurance) of Category A students are entirely covered by the grants (1000euros/month + a sum for travel, tuition fees...).

The amount of the fellowships of Category B students is 500 Euros/month.

Please note that the application deadline for the EU students is May 1st and **for non-EU students is January 20th** (online application - see website: <http://www.europhotonics.org>).
